### Product Summary

An advanced medical doctor consultation provides patients with an appointment via skype or facetime with a medical doctor authorized to prescribe via tele-medicine across Canada. The type of appointment is perfect for those who require mid range dosages (6-10 grams per day). Typically this is best for patients with conditions that require small amounts of edible cannabis products or whom are making their own marijuana concentrates.

This package is perfect for those who are looking to enter into Canada's ACMPR program for personal production. Patients seeking to work with one of Canada's Licensed Marijuana Producers (LPs) can also submit their prescription to the LP with our assistance. A key benefit of working with us at The 420 Virtual Clinic is that you get your prescription in your hands and are able to do what you need to do with it. You are not tied to one provider.

## Product Description

This consultation package includes:

- An appointment within 2-3 business days after receipt completed forms and payment with a cannabis friendly doctor - Guaranteed results, if for any reason you are not approved you don't pay - Assistance in submitting required paperwork to LP of your choice - Assistance in completing paperwork for Health Canada for personal production license - Discount code for [clonecorner.ca](#) for start-up materials - Discount with participating hydroponic stores across Canada - 20% off consultation session with leading medical cannabis consultants to advise on product selection and condition specific usage instructions
